

Professional Experience

Krishna Gundapudi is a distinguished physiotherapist with over 25 years of specialised experience in managing catastrophic injuries such as brain injuries, spinal cord injuries, and other complex neurological conditions. His deep expertise in physiotherapy has been fundamental in addressing the multifaceted rehabilitation needs of adolescents and adults, ensuring a holistic approach that integrates physical, cognitive, emotional, and social aspects of recovery. Krishna's person-centred methodology emphasises the individual needs of each client and their families, making him adept at handling complex cases that require nuanced physiotherapeutic intervention.

Throughout his extensive career, Krishna has not only provided direct patient care but has also excelled in leading multidisciplinary teams to develop and implement comprehensive rehabilitation packages tailored to the specific goals of clients. His effective leadership in physiotherapy settings is demonstrated by his role in organising regular strategy meetings that enhance team coordination and improve patient outcomes. His significant contributions to the NHS, private sector, and voluntary organisations have included spearheading physiotherapy services in community rehabilitation units and neurological care, illustrating his profound impact on therapy provision and patient care standards.

Krishna has held strategic leadership positions such as Therapy Lead for Community Hospitals and Physiotherapy Professional Lead for Neuro services, where he has overseen extensive therapy operations and driven advancements in physiotherapy practice. His role as the Clinical and Professional Lead for Integrated Care involved leading transformational programs that improved the health and well-being of local populations through integrated physiotherapy practices. Krishna's ongoing commitment to professional development is evident in his active engagement in neuro-physiotherapy conferences, his delivery of specialised courses on balance rehabilitation, and his thorough training in Civil Procedure Rules relevant to expert witness responsibilities. This robust foundation in clinical and academic physiotherapy makes Krishna exceptionally qualified to write expert witness reports, providing reliable, evidence-based testimonies in legal contexts.

Krishna is fully trained in the Civil Procedure Rules, including relevant revisions as they arise. She actively maintains her continuing professional development via a range of training opportunities.
