

## Professional Experience

Dearbhla Shannon is an Occupational Therapist, with ten years of dedicated experience specialising in acute stroke, stroke rehabilitation, and comprehensive neuro-rehabilitation. Her distinguished career is marked by her deep involvement in the treatment and management of progressive neurological conditions, including Parkinson's disease, Multiple Sclerosis, Huntington's disease, Dementia, and Alzheimer's. Dearbhla's clinical approach is holistic, prioritising the integration of posture and seating assessments, physical and cognitive rehabilitation, fatigue management, and the enhancement of daily living activities through adaptive equipment and home modifications.

Her extensive experience spans a variety of critical service areas, from elderly care and falls prevention to more acute domains such as respiratory, cardiology, and orthopaedics. Dearbhla excels in the complex discharge planning process, working in tandem with multidisciplinary teams to facilitate seamless transitions from acute care settings to the home, ensuring patients receive the comprehensive support they require. This process underscores her exceptional ability to navigate the intricacies of patient care, particularly for those facing life-altering injuries.

In her leadership role as the Team Lead for Occupational Therapy within Acute Stroke services, Dearbhla has demonstrated unparalleled skill in orchestrating discharge plans in collaboration with Community Stroke teams. She adeptly manages a team of clinicians, guiding their professional growth and ensuring the delivery of high-calibre care across the continuum of stroke recovery—from acute care to community reintegration. Her dedication to maintaining an evidence-based practice is reflected in her commitment to ongoing professional development, engaging in specialised training and workshops that enhance her expertise and inform her practice.

Dearbhla's background is further enriched by her work in both acute hospital and community settings, where she has implemented neurology-specific assessments and treatment programs aimed at maximising patient well-being and occupational performance. Her leadership extends beyond clinical care, encompassing the management of multidisciplinary teams and contributing to the development of services that uphold the highest standards of care.

Dearbhla is fully trained in Civil Procedures Rules, including relevant revisions as they arrive, and regularly undertakes a variety of clinical and medico-legal training.
